The RV220W require remote management to be on port 443 or 60443. Aside from this, the QVPN is as simple as the PPTP in the sense, you create a user, specify the user type as QVPN. As far as 3rd party clients, I personally don't have a prepared documentation for the setup (I'm not at work!).

### **RV220W VPN Setup - Cisco Community**

I have found 1.0.3.5 very stable in my setup, but when loading a beta 1.0.4.1x then i have random reboot issues. Cisco are looking into these. I also hope that something more stable is made available soon as my RV220W is setup for cisco to try to find the route cause.

### **RV220W - Firmware Update before EOL? - Cisco Community**

Like Alexandru I also had different expectations when I selected this Cisco router. There seem to be many problems with the router and the documentation. For example, for the VPN Wizard the documentation specifies that the local wan address can be left blank, but in the interface it requires a value.
