Mutant Reverb 'Mutant Reverb' is a mono-to-stereo reverb plugin with a built-in ducker; perfect for vocals, percussion, synths and many other applications where you need precise control of reverb tails. Adding reverb to sounds gives warmth, character and places the sound in a real-world space. However, big problems arise when a reverb tail masks the clarity of the original signal, resulting in a muddy and undefined sound.

Mutant Reverb | W. A. Production

Mutant Reverb offers Stereo Split processing with a lush reverb algorithm that can turn a mono source into a stereo reverb signal. We've also included several controls to tune the room and tail character of the reverb effect. The Internal Ducker section gives you the typical threshold, ratio, attack, hold and release controls, to create space in your mix.

Mutant Reverb Demo

Mutant Innovation Group Limited was found in 2008. By realizing the significant variation in quality of products across different manufacturers, management of Mutant Innovation decided to take full control on quality, features, and value, by developing and manufacturing its own series of products under the Mutant label. Mutant label becomes quality assurance label for the consumer in both US ...

Mutant Innovation Products | STI Certified Products, Inc

Mutant Delay's High & Low pass filter dials can be used to filter the output of the delayed signal in two different ways. Mode A limits the entire delayed signal to the upper and lower frequency limits. Mode B will introduce the frequency shaping slowly as the delay feeds back - an interesting and creative effect.

Mutant Delay, Mutant Delay plugin, buy Mutant Delay ...

Even after I made adjustments, according to the manual, the noise was not only directly audible, but showed up on the MP3's produced. Filtering with Audacity, which should have been an unnecessary step, was not sufficient. I can't stand the noise. The Mutant operated as described in the manual, no problems there. However, the noise is unacceptable.
