A simple workflow on a SharePoint 2013 doc library is not starting. The workflow should start under these conditions: The doc library has check-out/check-in enabled. The workflow does not start whether the item's status is modified to Change Required, saved, and left checked out or whether modified to Change Required, saved and checked in.

Workflow on Document Library not starting - Nintex Community

The Workflow will reassign the document to the first reviewing department's "queue" and alert the department that they have an approval task waiting More often than not, the reviewing department will need to red-line/mark-up changes on the document and then return it to the initiator to accept/reject the changes (this is not a simple "Approve ...

Document Review/Approval Workflow - Nintex

Where To Download Nintex Workflow Documentation

Coming to Nintex Workflow example, here once a user uploads document in SharePoint Document Library, a workflow task will be created and an Email goes to Approver. Approver will check the document and Submitted as Rework Required or Approved or Rejected. Then Initiator will get an email about the status of the Document.

The Nintex Workflow Cloud API allows you to connect your own applications to the Nintex Workflow Cloud, giving you access to the workflows, tasks and instance data in your tenant. Connect your application to documents in Box, tickets in Zendesk, records in Salesforce, Microsoft SharePoint lists and a host of other services.

Nintex Workflow Cloud API | Nintex

I have a workflow which is trying to achieve two goals, 1) copy documents from a document set in a library (not the docset itself) to another document set (with folder structure) in another library in the same site; and 2) log the details of the copied files to the workflow history. The attached .nwf file is the workflow so far.

Copy documents from Document Set to Folder - Nintex Community

With Nintex Workflow Cloud, you can create an automated process to guide your document through as many reviews as it needs. With Nintex Workflow Cloud, in under 60 minutes, you can create a consistent automated process. In this workflow solution, when an author uploads their new marketing document into the Draft folder in Box

Automate your document approvals - Nintex

Create a new document library, and open the Nintex Workflow designer. Click on the Library tab, and select Nintex Workflow in the Ribbon. On the Workflow Gallery page, click New list workflow. For a related tutorial, see "Automate document review routing" in the Nintex Workflow for Office 365 help.

Simple Approval Workflow - Nintex Workflow for Off ...

In Nintex Workflow, to query for documents in a document set, you use a Query List action. I've found the easiest way to do this, is to add a Query List action to your workflow, configure it by selecting a list that contains your document set then add a field that you want to extract (usually the ID field).

Nintex Workflow - Querying a Document Set - Vadim Tabakman
