Kibe, March 2020

Disaster medicine is predicated on the principle of providing care to the most victims possible, as dictated by the resources available and by patient condition and likelihood of survival. This amounts to a balance of needs versus assets, an equation that can change over time as more resources are pulled into the response.

Disaster Medicine - an overview | ScienceDirect Topics

1. Introduction. The emergency department (ED) is a "unique operation, optimized to exist at the edge of chaos". 1 Its doors are open 24 hours a day, 365 days a year. It is prepared and equipped to provide comprehensive emergency care to the community in emergent and non-emergent situations.
