An information technology audit, or information systems audit, is an examination of the management controls within an Information technology (IT) infrastructure. The evaluation of obtained evidence determines if the information systems are safeguarding assets, maintaining data integrity, and operating effectively to achieve the organization's goals or objectives.

**Information technology audit - Wikipedia**

Information technology can be both the cause to fraud and the solution to fraud. Auditors can use information technology to assist in an audit, while a company can use computer software in order to make records easier to collect. Information technology is becoming an increasingly more important part of a company's business strategy.
